

VACANCY FOR THE POST OF A FREELANCE RESEARCHER WITH DATA ANALYTICS SKILLS, REMOTE/HYBRID

Our Profile:

We are a forward-thinking company specializing in delivering high-quality content and creative solutions to the maritime industries. Our work involves crafting compelling narratives that drive engagement, build brands, and achieve business goals. We value creativity, precision, and innovation in everything we do.

Job Description:

We are seeking a highly motivated and skilled Freelance **Researcher with expertise in data analytics** to join our team. The ideal candidate will have a strong analytical mindset, excellent research abilities, and experience in interpreting complex datasets to generate actionable insights. This position offers the flexibility of remote work and the opportunity to collaborate on a wide range of projects across various industries.

Job Responsibilities:

1. Conduct in-depth research on topics relating to the maritime industry, including maritime insurance, and industry developments.
2. Collect, clean, and analyze large datasets to identify patterns, correlations, and trends.
3. Develop and implement data-driven methodologies to

address research questions and solve business challenges.

4. Present research findings and insights through well-structured reports, dashboards, and presentations.
5. Use statistical and data visualization tools to communicate complex information in a clear and actionable manner.
6. Stay updated on the latest tools, technologies, and best practices in data analytics and research.
7. Collaborate with cross-functional teams to understand project objectives and deliver insights that meet organizational needs.

Qualifications & Skills

Required Qualifications:

- HND/BSC in Data Science, Social Science, Statistics, Economics, Business, or a related field (advanced degree preferred).
- Proven experience as a researcher or data analyst, preferably in a freelance or consulting capacity.
- Proficiency in data analysis tools.
- Strong experience with data visualization platforms
- Excellent knowledge of research methodologies and statistical analysis techniques.
- Exceptional written and verbal communication skills, with the ability to present findings to both technical and non-technical audiences.
- Strong organizational and time management skills, with the ability to handle multiple projects simultaneously and meet tight deadlines.

Preferred Skills:

- Experience with machine learning and predictive modeling techniques.

- Familiarity with qualitative research methods and tools.
- Knowledge of specific industries such as healthcare, finance, technology, or marketing.
- Certification in data analytics or related disciplines.

What We Offer:

- Competitive compensation based on project scope and complexity.
- Flexible remote work arrangement.
- Opportunities to work on diverse and impactful projects.
- Professional growth and learning opportunities through collaboration with industry experts.

HOW TO APPLY

- Interested candidate should send their CVs to hr@globalclique.net
- Use the job title as the subject of the mail.
- Only shortlisted candidates will be contacted.
