

VACANCY: SITE ENGINEER / CONSTRUCTION PROJECT MANAGER – LAGOS

About the Company

A reputable construction and real estate development firm in Lagos is seeking an experienced professional to join its growing team. The company is known for delivering top-quality residential, commercial, and mixed-use projects with a strong commitment to innovation, precision, and sustainable building practices.

Job Summary

The Site Engineer / Construction Project Manager will oversee and coordinate all phases of construction projects—from planning and execution to delivery. This role requires a detail-oriented and result-driven individual with strong technical expertise, leadership skills, and proven experience managing on-site operations efficiently and within budget.

Key Responsibilities

Supervise and manage day-to-day site activities, ensuring compliance with approved drawings, specifications, and safety standards.

Plan project timelines, allocate resources, and ensure adherence to project schedules.

Coordinate effectively with architects, consultants, contractors, and suppliers.

Monitor materials, labor, and equipment use to ensure cost control and minimize waste.

Lead and motivate on-site teams to achieve productivity and quality targets.

Prepare site reports, progress documentation, and project updates for management.

Enforce health, safety, and environmental (HSE) standards at all times.

Identify and resolve technical or operational challenges promptly.

Liaise with procurement and logistics teams for timely supply of materials and equipment.

Requirements

Education & Certification:

B.Sc. or HND in Civil Engineering, Building Technology, Construction Management, or a related discipline.

Professional certification (COREN, NSE, NIOB, PMP, or equivalent) is an added advantage.

Experience:

Minimum of 5 years of solid experience in construction project supervision and site management.

Demonstrated success in managing medium to large-scale building projects (residential, commercial, or mixed-use).

Skills & Attributes:

Strong project planning, coordination, and leadership abilities.

Excellent communication and problem-solving skills.

Sound knowledge of structural drawings, construction standards, and quality control.

Proficiency in MS Project, AutoCAD, and other relevant software.

Ability to deliver projects on time, within budget, and to the highest quality standards.

Salary & Benefits

Competitive and commensurate with experience.

Performance-based incentives.

Professional growth and development opportunities.

Supportive and collaborative work environment.

Work Schedule

Mondays – Saturdays (with flexibility based on project demands)

How to Apply

Qualified and interested candidates should send their CV and portfolio of past projects (if available) to:
